Frontend Developer

Frontend-focused developer with a web development and UX education who builds clean, practical interfaces and data-driven tools. Combines hands-on HTML, CSS, JavaScript, React, Next.js, Tailwind CSS, and email/template work with Python and SQL experience from analytics roles, making it easier to ship usable products end-to-end.

Core Skills

- HTML5, CSS3, JavaScript, TypeScript, React, Next.js, Tailwind CSS, Bootstrap.
- Flask for lightweight APIs and backend support to frontend apps.
- Responsive UI implementation, email template development, and UX-minded layout.
- Python, SQL, Pandas, NumPy for data-heavy frontends and tooling.
- Data visualization, workflow automation, Agile collaboration, Jira.
- WordPress, Carrot, ArcGIS (supporting data and geospatial projects).

Selected Projects

- **EV Dashboard Web App** — Built an interactive dashboard using Flask, Python, and Chart.js to visualize EV charging and usage data, focusing on clear UI and responsive layouts.
- **Frontend Portfolio Site** — Implemented a personal portfolio in Next.js, Tailwind CSS, and TypeScript, emphasizing clean navigation, project cards, and mobile-first design.
- **Email Marketing Templates** — Designed and coded dealership email templates in HTML and CSS, improving readability and visual hierarchy for marketing campaigns.

Professional Experience

Trevity LLC — Data Scientist

December 2025 – Present

- Build Python and SQL workflows to analyze large operational datasets and turn complex information into usable outputs for stakeholders.
- Identify trends, anomalies, and operational risks across maritime-related datasets including vessel traffic, weather, sensor, and satellite sources.
- Collaborate in Agile delivery environments and manage work through Jira while supporting decision-ready products.

NextEHealth — Contract Web Designer

April 2022 – November 2022

- Built frontend web applications using HTML5, CSS3, Bootstrap, JavaScript, React, and PHP.
- Translated design and business needs into usable web interfaces with a focus on layout, presentation, and functionality.

DataClover — Email Designer/Developer

June 2023 – August 2023

- Designed HTML and CSS email templates for dealership clients.
- Produced marketing-oriented layouts that required clean visual structure and frontend implementation skills.

SEO For Real Estate Investors LLC — SEO Specialist

May 2022 – November 2022

- Supported website optimization efforts and completed custom HTML and CSS design tasks for client web pages.
- Worked with WordPress and Carrot to build and adjust real estate investor pages.

US Army — Geospatial Analyst

February 2024 – Present

- Worked with geospatial workflows, multi-source data, and analytical products in support of operational decision-making.
- Strengthened technical problem-solving, data interpretation, and cross-functional communication skills relevant to data-driven product work.

Additional Experience

Trevity — FMV Analyst | June 2025 – October 2025

Produced analytical reports and visual products, analyzed FMV and geospatial data, and applied quality control standards to maintain accuracy.

Bow Wave LLC — Intelligence Analyst | February 2025 – June 2025

Conducted multi-source analysis, evaluated data reliability, and identified patterns across datasets.

Charlottesville-UVA-Albemarle Emergency Communications Center — Emergency Dispatcher | October 2025 – December 2025

Handled high-volume incidents in real time and coordinated across emergency response teams in a fast-paced environment.

Smart Start, Inc. — Lead Technician | April 2015 – February 2025

Managed installation, troubleshooting, calibration, inventory checks, scheduling, and direct customer support across a long-term technical service role.

Education

- **Undergraduate Certificate, Web Development** — DeVry University, July 2019 – November 2020. Focus on modern frontend development, HTML/CSS, and web application fundamentals.
- **Certificate, UX Design** — Google, September 2021 – March 2022. Emphasis on user-centered design, wireframing, and usability-focused interfaces.
- **Associate's Degree, Military Intelligence, General** — Cochise College. Background in analytical thinking, structured reporting, and operational workflows.

Certifications

- Programming for Everybody (Getting Started with Python) — University of Michigan.
- Python for Data Analysis: Pandas & NumPy — Coursera.
- Google Data Analysis with Python — Google.
- Generative AI Mastermind — Outskill.
- IS-103: Geospatial Information Systems Specialist.
- IS-922.A: Application for GIS Emergency Mana
